

FROM THE DESK OF
GUY RENZI
VICE PRESIDENT, GAMING OPERATIONS

Since last August we've been busy creating a new casino experience for you at Turning Stone. We're excited to let you know that remodel of our casino's largest area, the front section, is now complete. We hope you'll find time to visit this beautiful area with its dramatic canopy ceiling.

With this major area done, our extensive gaming floor improvement project is more than halfway complete. Thank you, for your patience and your loyalty to Turning Stone through this exciting transition.

Our comprehensive redesign updates Turning Stone by offering a more contemporary, brighter casino, and adds welcome amenities such as self-serve beverage stations on the gaming floor. The project has also allowed us infrastructure upgrades that will enable Turning Stone to continue bringing you the newest games and other enhancements to make your playing experience even better.

For our guests who visit smoker-friendly Casino Blue and the Golden Dragon gaming area, over the coming weeks we'll be making further improvements based on feedback we've received. This will include enlarging Casino Blu so that we can add more games, and a greater variety of them. I'll send additional information out on these changes soon.

Thank you again for your patronage and patience. We're in the final stages of remodeling now, and this spring we look forward to inviting you to enjoy a grand celebration of our completed project.

Sincerely,

Guy Renzi
